GOT MOO-LA?
Where to go for business assistance in Wisconsin
WI Dept. Of Ag
**Introduction**

This resource was assembled by the Wisconsin Department of Agriculture, Trade, and Consumer Protection (DATCP), Division of Agri-Business as a tool to help small businesses develop and grow their value-added business using money, information, and technical assistance from outside their organization.

This resource was assembled from a variety of other resources and does not constitute a complete listing. This is an effort to gather currently available information and present it in a consolidated, but brief format. Details can be provided directly by the organization listed. The most current version of this document can be viewed at [http://datcp.wi.gov/uploads/Business/pdf/Wisconsin_Business_Resources.pdf](http://datcp.wi.gov/uploads/Business/pdf/Wisconsin_Business_Resources.pdf) or you can Google “Got Moo-La?” and click on the link.

Every effort has been made to maintain accuracy and completeness. If additional information is needed or inaccuracies are found, please contact:

Entrepreneur.com’s Best Banks for Small Business in Wisconsin

Top Lenders in Wisconsin

The following ranking is based on information from the SBA’s most current study on small-business lending activities, *Small Business Lending for 2009-2010*. The ranking lists, by state, the banks that were ranked the top business-friendly lenders. (In the case of a tie, the banks are listed alphabetically.) Microbusiness loans are defined as business loans of less than $100,000. In cases where the banks were acquired after this listing was compiled, we list both the old and new names of the bank.

The study uses four criteria to identify and rank the banks identified as microbusiness-friendly:

1. the ratio of microbusiness loans to total assets
2. the ratio of microbusiness loans to total business loans
3. the dollar value of microbusiness loans
4. the total number of microbusiness loans.

WI TechSearch:
Service of UW-Madison Wendt Engineering Library
http://wts.wisc.edu/
Wisconsin TechSearch (WTS) provides document delivery and research assistance services. WTS research assistance includes on-line literature, patent, and trademark searches. We have access to over 500 subject-specific databases and can provide you with a list of articles or patents on a research subject of interest.

Patent and Trademark Services
http://wendt.library.wisc.edu/help_with_research/patents

The U.S. Patent and Trademark Office have designated Wendt Library as a Patent and Trademark Depository Library (PTDL). The library maintains all U.S. utility, design, and plant patents in various formats, and provides reference tools and searching assistance for both the general public and the UW-Madison community.

How We Can Help You

Patent searching and providing general information about the application process. Respond to short, specific patent or trademark-related questions in person, by phone, or by email.

We urge you to contact a registered patent attorney for help with specific legal questions about patentability and your application. The completeness and accuracy of a patent or trademark search rests entirely with the individual conducting the search.

Grant Writing Guidelines

Preparation
You are likely to find preliminary grant writing steps to be the most time consuming, yet most vital aspect of the process.

1. Define your project
   • Clarify the purpose of your project and write a concise mission statement.
   • Define the scope of work to focus your funding search.
   • Determine the broad project goals, then identify the specific objectives that define how you will focus the work to accomplish those goals. Example:
     o Goal: Improve production quality
     o Objective 1: Recruit talent.
     o Objective 2: Train producers.
     o Objective 3: Upgrade equipment.
   • Decide who will benefit.
   • Draft expected project outcomes in specific measurable terms.
   • Draft a timeline including planning, the searching for funds, proposal writing, and the intended start date.

2. Identify the right funding sources
   • Foundation centers, databases, station development offices, publications, and public libraries assist your search.
   • Do not limit your funding search.
   • Look for a match between your project and the grants.
   • Make direct contact with funders to support projects like yours.
   • Request proposal guidelines.
   • Ask about the maximum amount available/average size/funding range.
   • Determine if funding levels of the grants you select are appropriate.
   • Find out whether the funder has other grant sources for your project.

3. Contact the funders
   • Think of the funder as a resource.
   • Identify a project officer who will address your questions.
   • Ask for assistance, including a review of proposal drafts.
   • Inquire about budgetary requirements.
   • Matching funds? Is in-kind acceptable? Learn about payments.
   • Remember, the contacts you make may prove invaluable.

4. Acquire proposal guidelines
   • Read the guidelines carefully, then read them again. Ask questions.
   • Guidelines usually tell you about:
     o submission deadlines
     o eligibility
     o proposal format: award levels forms, margins, evaluation
     o process and restrictions on the number criteria of pages, etc.
     o review timetable

   o budgets
   o funding goals and priorities
   o award levels
   o evaluation process and criteria
   o whom to contact
   o other submission requirements

5. Know the submission deadline
   • Plan to submit your proposal on or preferably before the deadline.
   • Determine what format the funder requires for submission.
   • Be realistic about whether you have time to prepare a competitive proposal.
   • Know the funder’s policies on late submissions, exceptions, and delays.
   • Find out how the funder will notify you receipt/status of your proposal.
   • Determine personnel needs
   • Identify required personnel both by function and, if possible, by name.

6. Update your timeline
   • Factor into your schedule time to write multiple drafts, solicit project officer for review of draft, gather materials, and prepare an impartial critique of your proposal for clarity, substance, and form.

Writing the Proposal
Structure, attention to specifications, concise persuasive writing, and a reasonable budget are the critical elements of the writing stage. Read the guidelines for specifications about required information and how it should be arranged.

1. Narratives
   • Statement of need
   • Purpose, goals, measurable objectives, and a compelling reason for proposal
   • Approach
   • Method of accomplishing goals, description of scope-outcomes, outline of activities, personnel functions with names of key staff and consultants
   • Method of evaluation
   • Some require very technical measurements of results. Inquire.
   • Project timeline
   • Paints a picture that includes start and end dates, activities, and outcomes.
   • Credentials
   • Information about the applicant that certifies ability to successfully undertake the effort.

   Tips on Writing the Narrative:
   • Questions narratives satisfy:
     • What do we want?
     • What concern will be addressed and why?
     • Who will benefit and how?
     • What specific objectives can be accomplished-how?
     • Results measured?
     • How request relates to funders purpose, objectives, and priorities?
     • Who are we and how do we qualify to meet this need?

The HOOK:
There are many ways to represent the same idea. However, the HOOK tailors the description of the idea to the interest of a particular funder. The HOOK aligns the project with the purpose, and goals of the funding source. This is a critical aspect of any proposal narrative because it determines how compelling reviewers will perceive your proposal to be.

1. Budget
   • Budgets are cost projections. Be sure to only include those things the funder is willing to support.
   • Funders use these factors to assess budgets:
     o Can the job be accomplished with this budget?
     o Are costs reasonable for the market - or too high or low?
     o Is the budget consistent with proposed activities?
     o Is there sufficient budget detail and explanation?
     o Many funders provide mandatory budget forms for the proposal.
   • Don't forget to list in-kind and matching revenue, where appropriate.

2. Supporting materials
   • Often arranged in an appendix. These materials may endorse the project and the applicant, provide certifications, add information about project personnel and consultants, exhibit tables and charts, etc.
   • Policies about the inclusion of supporting materials differ widely among funders.
   • Find out if supporting materials are desired or even allowed.

3. Authorized Signatures
   • Authorized signatures are required.

4. Specifications
   • Tailor proposal writing to specifications found in the guidelines. Include only the number of pages allowed. Observe the format. Is there a form to complete? Are cover pages allowed or desired? Elaborations should add depth and scope.

5. Submission checklist
   • The complete proposal must be submitted on time in the requested format.
   • Address the proposal as directed in the guidelines.
   • Be sure to include required documentation.

Follow-up
• Contact the funding source about the status and evaluation of your proposal. Request feedback-strengths and weaknesses.
• Reference information may also be useful if you choose to approach the same funder again.
